

WINAD

Financials Database – Fact Sheet

Win AD's Financials database: Searchable, online database of annual revenue and expense data from D-I and D-II NCAA financial reports, as well as Independent Auditors' Report and Agreed Upon Procedures.

We built the Financials database to support budget planning by unlocking detailed financial data for D-I and D-II institutions.

What are conference peers spending on field hockey recruiting?

What is the exact amount of student fee revenue received by similar sized programs?

How can I quickly benchmark marketing spending by peers in conference?

Where can I access PDF copies of NCAA financial reports?

How can I determine a reasonable travel budget for men's soccer?

Win AD's Financials database is designed for proactive budget management and offers the ability to filter financial data by numerous criteria, including subdivision, conference, school and any major revenue or expense category (e.g., donations, student fees, tuition, travel).

"In our world of finances and budgets, the information and variety of resources that Win AD provides is invaluable."

Chris Iacoi

Sr. Associate Athletic Director
Chief Financial Officer, UCLA
